At CompliancePlus we adapt our services to our Customer's needs. That's why we're pleased to announce the additional service of Auditing Paper Logs.

With the much anticipated Canadian E.L.D. Mandate suggested to be fully implemented by December 2019, the details of which are expected to be released in the Spring of 2018, CompliancePlus is prepared to face the challenge of on-boarding E.L.D.s for Carriers that have traditionally remained in Canada. But in the meantime, current Canadian regulations still allow Paper Logs. At CompliancePlus we realize that transitioning over to Electronic Log Devices may take time for some Carriers, that's why we're adding Paper Log Auditing to our Service solutions.

At CompliancePlus we work for Carriers, not E.L.D. Providers.
